Higher National Diploma in Information Technology
HNDIT1022 –Web Design
First Year- Semester I

Lab Activity 05

Group Assignment: Ask students to come to the front of the class and write the coding

How to place text on image using HTML and CSS? /
How to position text over an image????

Often web developers wish to place some text over an image to display some information regarding that particular image. This can also play an important role in making your website or the image more attractive, thereby, enhancing the chance of grabbing the user's attention. Now there are various positions where you can add your text on an image as follows.

1. Top left corner

2. Bottom left corner

3. Center

4. Top right corner

5. Bottom right corner

Demonstrate one example for each of these positions.
